

SCREENING FOR ADHESIVE ARACHNOIDITIS

		YES	NO
1	Do you have constant back pain?		
2	Do you have difficulty starting or stopping urination?		
3	Do you have burning on the bottom of your feet?		
4	Do you have blurred vision or ringing in your ears?		
5	Do you have to stand after you have sat for 10 minutes?		
If you answer yes to 4 of the 5, you very likely have adhesive arachnoiditis.			

Every health practitioner not only needs to know about arachnoiditis, they should know how to screen back pain patients for this disease. Advocates and teachers of arachnoiditis should know how to screen for it.

WHY SCREEN FOR ARACHNOIDITIS?

**The earlier the diagnosis in the course of the disease,
the better the results of treatment.**
