ARACHNOIDITIS (ARC) TREATMENT ALERT #4

IT TAKES TWO – ONE WON'T DO CURATIVE PLUS SYMPTOMATIC AGENTS

CRITICAL MESSAGE TO ALL AA PATIENTS

Our research clearly shows that to stop progression of AA and find significant relief and recovery, almost all persons with this disease must simultaneously take agents (usually multiple) from both groups – not just one.

<u>CURATIVE AGENTS – Partial List</u>	<u>SYMPTOMATIC AGENTS – Partial List</u>
Low dose naltrexone*	Low dose naltrexone*
Ketorolac	Gabapentin
Corticosteroids:	Topiramax
Methylprednisolone	Cymbalta® (duloxetine)
Dexamethasone	Lyrica® (pregabalin)
Gonad extract: Bovine	Soma® (carisoprodol)
Adrenal extract: Bovine	Zanaflex® (tizanidine)
Curcumin/turmeric	Xanax® (alprazolam)
Serrapeptase	Valium® (Diazepam)
Metformin	Adderall® (amphetamine salts)
Acetazolamide	All Opioids
Minocycline	Lidoderm® (lidocaine)
Pentoxifylline	Ketamine
Human chorionic gonadotropin	Oxytocin
Pregnenolone	All antidepressants
DHEA	All anti-seizure agents
Testosterone	All muscle relaxants
Estradiol	Cannabinoids
Progesterone/medroxyprogesterone	Clonidine
Nandrolone	Kratom
Palmitoylethanolamide (PEA)*	Valerian root
	Palmitoylethanolamide (PEA)*

* Low dose naltrexone and palmitoylethanolamide (PEA) have both anti-inflammation and pain reduction ability, therefore, they are highly recommended.

WHY DO YOU NEED BOTH CLASSES OF AGENTS?

SYMPTOMATIC – provides comfort and pain relief so you can move, think, eat, and physically be active to speed recovery.

CURATIVE: Reduces neuroinflammation and promotes neuroregeneration to progressively reduce your basic disease.
