

# ARACHNOIDITIS

Revised - Bulletin 9  
June, 2019

## THE 3 KEYS TO TREATING LUMBAR-SACRAL ADHESIVE ARACHNOIDITIS

The proper treatment of confirmed cases of lumbar-sacral adhesive arachnoiditis requires the simultaneous administration of these 3 components:

### 1. Suppress Neuroinflammation

Examples: ketorolac, methylprednisolone

### 2. Promote Damaged Nerve Regrowth (Neuroregeneration)

Examples: pregnenolone, nandrolone

### 3. Pain Control

Examples: low dose naltrexone, gabapentin

DR. BEAK says,  
For relief and recovery, you  
must simultaneously use  
all 3 components.

NURSE ROSEY says,  
Remember to treat  
all 3!
