### **New Products and Measures**

During the past 18 months some exciting new products and measures have been produced that will benefit almost all persons who have adhesive arachnoiditis (AA), intractable pain syndrome (IPS), or a multi-system collagen disease (MSCD). The new products and measures fit nicely into one of the three essential treatment components: (1) suppress inflammation, (2) restore damaged tissue, (3) relieve pain. Some of the new products target two of even all three components. Review them and try ones that may enhance your treatment program.
